# Surrealist or Realist?

Why automate insurances?

## 01 ● Multi-quote & buy / bind platform

For those Underwriters, Insurers & MGA's who wish to provide their Brokers or direct clients with a range of their SME insurance policies, online 24 / 7, offering both quote and buy / bind facilities, we can help at a rapid pace and at low cost.

As you may already know, many existing IT companies that provide you with software solutions have a pretty poor performance and delivery record, also possessing an arrogant attitude which is not deserved when you are paying them substantial sums of money.

## 02 ● So why us?

We are not all things to all men / women, but what we are is the best in the field of online trading and robotic animations. Equipped with almost certainly more experience than any other software provider in the UK and Internationally, in respect of building and servicing this type of facility.

We can and will deliver on time and at low costs with an end product that would shame the big names in IT.

If you have an existing online quote & buy / bind software project in mind, or you are looking to automate your insurance products for the first time, rather than just talking to your existing IT company ask us to demonstrate our software development capabilities. We are very confident you will be impressed with how differently we approach a project.

You certainly will have more to gain than lose, as not only can we help you with the build of a quote & buy / bind platform... but unlike a software house we can give you immediate FREE distribution of your products to over 600 brokers who currently have our platforms in the UK and Internationally.

For a free demo... Call us... Skype us... or visit us in our London or Eastbourne offices and we will happily chat about the possibilities.

- The Internet contributes to over \$2.2 TRILLION in annual retail sales!!!
- Online retail sales in the UK reached 52.25 billion in 2015 with an average spend of £1,200.
- 2.9 billion Google searches are conducted each day.

With Software That Doesn't Sleep

# The road to new clients

...is online

## 04.

### What we provide

The internet, smartphones, digital & social media are ALL here to stay and it is going to change the way insurance companies and Brokers conduct their SME business... are you ready?

If you want to increase your sales by offering Brokers and direct clients the very best service 24 / 7, then automation of your insurance products for SME's is the only practical way forward. Technology is changing our patterns of life and how we think and do things, but more importantly how our clients think and do things.

So.... Do you already have a quote & buy / bind platform? If not, WHY? If so, is the platform continuously meeting yours, your Brokers and direct clients' rapidly evolving needs? If you cannot answer yes to both questions, we are here to help you by delivering a comprehensive system, at a rapid speed and incredibly low cost!

## 05.

### Flexible, first class system

Our online Multi-quote & buy software leads the way in the UK and Internationally and is extensively used by Brokers, Insurers and Affiliate Groups around the world.

We have unrivalled experience in automating various schemes, allowing clients to purchase 24 / 7, all year round. Getting started is easy, for a quick, simple build all we need from you is:

- Rating Matrices
- Question Set/s & Declaration
- Policy Schedule/s & Wording/s
- Required renewal procedure
- Required mid-term adjustment procedure
- Required referral process

### Adaptable for You

Unlike many software houses, our bespoke capabilities allow us to cater for almost any insurance product that you would like to automate. This is ideal for 24 / 7 facilitation of high volume, low premium schemes, which will help streamline your distribution channels and develop your relationship with Brokers / clients.

## 06.

### Products we have built online

We have a long history of supplying several Insurance Providers with cutting edge insurance platforms in many countries, and consider ourselves as the leader in the field for SME insurance automation on the International stage.

# Advanced online metamorphosis for your office

## 07 ● Technology at its best

In the ever-increasing world of compliance and TCF principles surrounding the insurance industry, you will need to clearly demonstrate that any online facility offered to your Brokers / clients meets the strict requirements of storing all transactional data, at any point throughout the sales process.

Luckily enough for you, our back-office is one of the most proven and sophisticated systems of its kind and will help to fulfil your regulatory requirements. Again, it can be completely bespoke to meet your unique needs.

## 08 ● Information at a glance

Unlike many other systems, the process of reviewing and categorising data via the back-office is exceptionally straight forward.

Our flexible approach means you can choose how to breakdown the data. Usual examples chosen are by time, date, product type, country and which Broker bound / presented the submission.

Your back-office will help you to create reports and undertake in-depth analysis. By having quick and easy access to the data, you will be able to add serious value to your business by developing solutions to fulfil the advancing consumer requirements.

## 09 ● Simple one click automation

We all know how much time is lost to processing administration and handling mid-term changes. Fortunately, enough, your back-office provides 'one click' automation to save the day... and money!

Whether it is a change of name, address, issuing / re-issuing documentation / renewal notices, and / or higher limit requests, your back-office has the capability to action these with 'one click' delivery.

## 10 ● Data to help grow your business

In today's technology saturated climate, data is King and Queen. To stay ahead of your competition, you will need the means to effectively analyse consumer behaviour, interaction and buying habits. Your back-office system will not only help you analyse this information, but could also be the catalyst for innovation, helping you expand your business.

Your back-office system saves all real-time information that is generated through the quote & buy / bind facility, whether it is a sale, or not. Here's just a snippet of what features your back-office could include, however, it can be completely tailored to your specification:

*Clients completed proposals, quotations, incomplete quote requests (useful to see why and where clients drop off the page), bound policy information, payment methods, renewals area, Broker details, claims, mid-term adjustment requests and many more!*

## 11 ● Training

Our systems are built with ease of use in mind, however, it does not mean we do not provide any after-sales assistance. We are always happy to offer ongoing support and training to help you get the best out of your system. Whether it is via Skype, or you need an on-site visit, our team are prepared to assist.
